

WE ARE LOOKING FOR A PASSIONATE FULL-STACK DEVELOPER / AI ENGINEER INTERN FOR BARCELONA OR SINGAPORE

Klaud9.com is an online platform that matches photographers and brands to create amazing photos in 24 hrs across the region and at scale with technology for their social media/marketing campaigns. Our team consists of passionate photographers and creatives who developed Klaud9.com, a fun platform where marketers and creatives can find the best visual content creators.

We are seeking a passionate web developer to help us take our website to the next step. You will be helping the Head of Development to work on new solutions using Artificial Intelligence, Cognitive Computing and Machine Intelligence Technologies to improve the site automation and scalability.

Responsibilities:

- Understanding the business requirements, identifying and applying right AI or cognitive computing technologies to solve problems.
- Ensures the creation of an engaging and highly functional responsive websites.
- Has excellent multi-tasking skills with the ability to turn a project around quickly with no loss of quality whilst delivering to highest possible standards.
- A logical approach to problem solving
- Develops responsive design for usability in PC, mobile & tablet
- Creates technical specifications from functional specs
- Works with Webservices eg REST, SOAP,
- Adheres to web standards, usability & best practices
- Works closely with the design and content teams

Requirements & Skills:

- NodeJS, React, Angular7, Symfony3, HTML, JavaScript and CSS
- Develop required machine learning models or prototype applications applying formulated AI recipes and verify the problem/solution fit.
- Fluent in English
- Experience in web application development
- Experience in building of API driven interface development.
- Experience in developing cloud applications running on Amazon Web Service
- Experience with SOA architecture working on distributed/high trafficked systems.
- Solid software development fundamentals (Data Structures, algorithms, problem solving, OO Design, and system architecture).
- BS or MS degree in Computer Science or related experience
- Immediate availability.

Compensation:

- Salary: depending on experience
- Location: Barcelona or Singapore, full time. Our head-office is in Singapore, sometimes travelling to Singapore will be required
- A unique opportunity, unlike anything you have experienced before
