

# Internship Manufacturing & Operations

Are you looking for an internship with a **positive ecological impact**, in a small, dynamic team? Would you like to work in a stimulating, growing company **scale-up**? Then read on!

## About Konligo

Konligo – a 5 years old VUB spin-off located in Brussels – makes it possible for creative event managers to stand out during events, for themselves and their clients, with creative and adaptable structures.

The domes and stages bring an impressive immersive feeling and are installed very fast (hours instead of days).

*Our dream is a **zero-waste event sector** that does **more with less**: more resource efficiency, responsible use and material reuse and less impact on the environment.*

To achieve this, we combine creative engineering with the principles of sustainable development. We push structures to another level whilst continuing to strive for resource efficiency and acting responsibly.

At Konligo, we apply teal management principles; a decentralised and self-organising approach that empowers individuals to make autonomous decisions, fostering a culture of trust, purpose, and adaptive learning.

## Job description

### You are looking for :

- A thrilling and educational adventure in a scaleup
- A nice, fun, small and multilingual team
- A varied assignment
- A clear mission: let's change the event industry with beautiful and reusable structures

### What we are looking for :

- An internship of 6 months
- Manufacturing
  - Participate in manufacturing activities in the workshop, including assembly, fabrication, and quality control.
- On-site Installations
  - Support the installation team in setting up structures and stages at customer sites.
- Stock Management
  - Conduct regular inventory counts and update stock levels with our ERP system.
- Project Management

- Assist in ensuring the timing of manufacturing and rental projects is on track.
- Workflow Optimization  
Assist in identifying opportunities for optimization and efficiency improvement in the workflows.

## Wanted profile

This internship is open for any student in fields related to mechanical engineering, operations and project management. However, we are also interested in your personality, your motivation to contribute to the Konligo story and your perseverance to have an impact.

We seek the following competences:

- Good organizational skills and ability to manage multiple tasks
- Good communication and interpersonal skills
- Detail-oriented
- Ability to work both independently and collaboratively
- Comfortable with manual labour (mechanical work or material handling)
- Adaptable mindset
- Knows their way around Microsoft Office Suite (Word, Excel, PowerPoint).
- Some knowledge of ERP systems (e.g., ERPAG) is a plus
- Spoken languages : English, Dutch, or French (any)

## Interested?

You can apply by filling in this [form](#) and sending us a topping motivation letter.
