

UNITY DEVELOPER INTERNSHIP

Small startup, BIG opportunities

6 Months Remote Internship | Apply by 27th September 2020

At Skyrocket Your Team we're looking for a **Unity Developer** who's ready to buckle up and **take our online escape rooms to new heights.**

What is **Skyrocket Your Team**?

We're a young startup consisting of 5 founders and many supporters, **committed to change how team building and training is done in remote teams.** We do this through epic online escape room experiences, in which team members become closer together, get to know each other in different scenarios, and in the meantime, improve their communication skills.

You are **THE Unity Developer** we're looking for if you:

- Are currently a student (**this is a must**)
- Are interested in working in a remote team.
- Have previously developed in Unity.
- Know how to communicate online with your team members and enjoy teamwork.
- Can easily communicate with designers and understand that iteration is key for success.
- Are passionate about building top-notch experiences and taking things to the next level.
- You love escape rooms, challenges and creating puzzles.
- Have initiative and an entrepreneurial mindset.
- Can develop a concept into different variations quickly, and build up previous versions to bring the product to new heights.
- Feel that animations in Unity are a piece of cake for you.
- Speak English and C# fluently.

In the **Unity Developer Internship** you will:

- Help us take our current escape rooms to new heights.
- Design, code, document and test new online escape rooms on C# in Unity.
- Collaborate with our design team to build the best experience possible in every escape room.
- Develop innovative experiences.

What's in it for you?

- Get on board a fast paced startup that is one of the winners of the biggest hackathon ever done in the world.

- Join a young, enthusiastic and innovative international team.
- Work remotely, from wherever you want in the world. Always.
- Ditch the 9-5 work time and work whenever you're most efficient.
- Help co-create an innovative product that's like nothing else in the market with your software development skills.
- Get to know all the nitty-gritties of how an online escape room works.
- We will draft together with you a self-development plan, according to your professional needs and personal interests, and help you achieve it.
- You will be able to attend online conferences and training courses.
- Learn how a startup functions from the inside further than your own unity developer role.

How to apply?

Send us an email to hello@skyrocketyourteam.com with the subject "Unity Developer - Internship" by **27th September 2020 23:59h CEST** including:

1. Your CV.
2. Motivation letter explaining why you want to take on the Unity Developer Internship at Skyrocket Your Team.
3. Samples of your previous projects.

We will interview candidates on a rolling basis.

Flexible starting date from **September/October/November** whenever it's best for you. The length of the internship is also flexible, depending on what's best for you.
